Summary

Passionate Game Developer and Programmer with hands-on experience building 3D and web-based games using Unity and C#. Skilled in gameplay programming, physics-based systems, enemy AI state machines, procedural level generation, FPS mechanics, and animation state management. Experienced in asset and audio pipeline integration, debugging, and performance optimization.

- Shipped 6+ games across PC and web platforms.
- Runner-up at Zimension Game Jam 2025 in association with GDAI.
- 2+ Years of Experience in Unity Engine

Education

Gujarat Technological University

July 2023 ~ Present

- Bachelor of Engineering, Computer Engineering
- CGPA: 8.87

Metas Adventist International School

June 2019 ~ May 2023

- 12th Marks: 69% (PCM)
- 10th Marks: 70%

Skills

- **Programming Skills:** C#, C/C++, Python, Java
- **Tools:** Unity Engine, Visual Studio / VS Code
- **Foundational Knowledge:** OOP, Data Structures, Debugging, Prompt Engineering (Basic)
- **Soft Skills:** Problem Solving, Team Collaboration, Attention to Detail, Time Management, Positive Attitude

Achievements

- Runner-up — Zimension Game Jam in Association with GDAI | Sep 2025 Recognized by Game Developer Association of India (GDAI), Featured on Zimension3d.com Aug 2025 ~ Sep 2025
- Volleyball Winner — Lakshya 2k25 Feb 2025 ~ Feb 2025
- BIS Poster Competition — 3rd Rank in Manthan 2k25 Sep 2025 ~ Sep 2025
- Chess Runner-up — Lakshya 2k24 Feb 2024 ~ Feb 2024

Courses & Certifications

- Unity 3rd Person Combat & Traversal Dec 2025 ~ Present
- SAP Code Unnati Advance Program Jul 2025 ~ Present
- Runner-up in Zimension Game Jam in Association with GDAI Aug 2025 ~ Sep 2025
- Complete C# Unity 3D Game Development in Unity 6 Jul 2025 ~ Aug 2025
- SAP Code Unnati Foundation Program Jul 2024 ~ Feb 2025

Languages (Spoken)

- English • Hindi

Projects

Unity RPG | Status: In Development | Tools: Unity 3D, C#

Dec 2025 ~ Present

- Platform: PC
- Description: A big, story-driven RPG with strong combat, exploration, and character control systems.
- My Contribution (Game Programmer): Architected the core game framework in C#. Engineered complex state machines for enemy AI and combat mechanics, designed a modular inventory system, and implemented event-driven architecture for gameplay interactions. Focused on optimizing performance and writing clean, scalable code.

Zatun Zombie Game

April 2026 ~ May 2026

- Platform: PC
- Description: A high-fidelity third-person zombie survival shooter built entirely from scratch in Unity 6 as a technical test for Zatun. This project was developed to showcase a production-ready game.
- My Contribution: Solely designed and built every system in the game from the ground up. Engineered a hybrid hitscan-projectile combat system for 100% reliable hit detection and implemented IK-driven procedural animation rigging for natural weapon aiming and head tracking.

Web Based Game (The Secret Book) | Game Jam

15 Aug 2025 ~ 18 Aug 2025

- Platform: Web (Link: "<https://zimension3d.com/shrt/1mnU8z>")
- Description: The Secret Book is a mystery-adventure web game where you play as an archaeologist exploring a hidden cave, solving 4 unique puzzles to uncover the secrets of a lost civilization. Recognized by the Game Developer Association of India (GDAI) and featured on Zimension3d.com.
- My Contribution (Team Leader): Designed and optimized the map layout, crafted the overall game design, and built a focused 5-minute prototype gameplay loop — balancing exploration, puzzle flow, and player engagement within the jam's constraints. Implemented interactive puzzle mechanics and player interactions. Integrated assets and audio and performed debugging to ensure smooth gameplay.
- Achievement: Runner-up — Zimension Game Jam in Association with GDAI | Sep 2025 Collaborated with: Mohit Pipaliya & Amit Shah

SIH Village Map | Tools: Unity 3D, Level Design, Free Assets

Nov 2025 ~ Nov 2025

- Platform: PC
- Description: An immersive rural village map originally designed for a Smart India Hackathon project, built entirely using optimized free assets to create a realistic and performant layout.
- My Contribution (Environmental Designer): Focused strictly on environmental design and post-processing. Hand-placed terrain details, optimized lighting, and structured the village grid to run efficiently while maintaining a rich visual aesthetic.

Sharp Shooter Platform: Web (Browser) | Tools: Unity 3D, C#

Oct 2025 ~ Nov 2025

- Platform: PC
- Description: A sci-fi FPS arena game where players face enemy spawn portals and incoming projectiles — survive and destroy every threat before they destroy you.
- My Contribution (Game Programmer): Programmed robust FPS mechanics including a custom player controller, weapon raycasting, and projectile physics in C#. Developed dynamic enemy spawning algorithms and navmesh-based AI pathfinding. Integrated and optimized Unity VFX and particle systems via code

Royal Run Platform: Web (Browser) | Tools: Unity 3D, C#, Cinemachine

Oct 2025 ~ Oct 2025

- Platform: PC
- Description: An endless runner inspired by Temple Run and Subway Surfers, featuring continuous chunk-based level generation, coin & apple pickups, and smooth controls. My Contribution (Game Programmer): Engineered procedural level generation using object pooling to efficiently spawn and recycle environment chunks. Programmed player movement physics, collision detection, and score management systems. Integrated Cinemachine for dynamic camera tracking via C# scripts.

Galaxy Strike | Tools: Unity 3D, C#

Sep 2025 ~ Sep 2025

- Platform: PC
- Description: A sci-fi space combat game — a last-stand assault against dark forces, blasting through enemy fighters to save the galaxy.
- My Contribution (Game Programmer): Developed complex flight mechanics and fluid player controls using C#. Engineered AI behaviors for both enemies and allies using state patterns. Optimized collision detection and implemented efficient memory management for extensive laser and explosion particle systems.

Rocket Boost | Tools: Unity 3D, C#, Cinemachine

Aug 2025 ~ Aug 2025

- Platform: PC
- Description: A 3D exploration demo set on a mysterious lost planet, built as a foundational Unity project focused on core gameplay mechanics.
- My Contribution (Game Programmer): Implemented rigid-body physics and custom force-based movement controllers in C#. Scripted collision logic, trigger events, and dynamic camera follow behaviors to ensure smooth interaction between the player and the 3D environment.
